17. Form UI
Input fields, dropdowns, checkboxes, sliders

18. EC App UI Patterns
Mobile-specific patterns from the EC app

Primary Palette

Electric Castle uses a bold, high-contrast color palette anchored by a vivid red and a deep navy dark. These two colors form the backbone of the entire visual identity. A bright yellow serves as the primary accent/CTA color.

EC Red #DC3529 Primary brand, headers, CTAs	EC Dark Navy #0F1428 Primary background, text	EC Yellow #FFE600 CTA buttons, accents, highlights
--	--	---

EC Red (#DC3529): Used for the header/navbar, primary navigation labels, brand mark background, sectiontitle accents, and key visual dividers. A warm, vibrant red with strong brand recognition.

EC Dark Navy (#0F1428): The dominant background color for all dark-mode sections, the hero area, ticket cards, and most content containers. Creates a premium, immersive nighttime festival feel.

EC Yellow (#FFE600): The critical action color. Used exclusively for primary CTAs (ADD TO CART, GET TICKETS, BUY NOW, SUBSCRIBE). Bright neon-adjacent yellow creates maximum contrast against the dark navy background.

Secondary Palette

The secondary palette is used for ticket pass color-coding and stage identification:

General Pass Red-Orange #AA3C32	VIP Pass Pink/Magenta #D25096	Youth Pass U25 Blue #4682C8	Camping Pass Green #28B950	Ultra VIP Purple #823CC8
---	---	---	--	--

Accent & Support Palette

Light Gray #F5F5F5	Mid Gray #787878	White #FFFFFF	Off-White #EBEBEB
------------------------------	----------------------------	-------------------------	-----------------------------

Gradient & Overlay Usage

EC does not use gradients as a primary brand element. However, photo overlays use a dark-to-transparent gradient from bottom (approx 60% dark navy at 70% opacity) to allow text legibility over photography.

- Hero section: Horizontal video/image with overlaid text — no gradient, text directly over media
- Sustainability banner: Olive/dark green toned image with white text overlay
- Ticket cards: Flat off-white (#F5F5F5 or very light cream) background with solid color left-border stripe
- Loading/empty states: Dark navy base (#0F1428) with light gray (#F5F5F5) content area

Color Application Rules

- Never use EC Yellow (#FFE600) for text over white — insufficient contrast
- Never use EC Red (#DC3529) as a page background — only for header, accents, and dividers
- Dark Navy (#0F1428) is the primary background for all immersive/hero sections
- Light (#F5F5F5 / #FFFFFF) backgrounds are used for informational/editorial sections
- Pass accent colors should only appear as left-border stripes on ticket cards — not as full backgrounds
- EC Yellow CTA buttons ALWAYS have dark navy (#0F1428) text — never white or red text
- The "EC Radio" player at the bottom uses dark navy background with yellow play button

Primary Typeface: Headline/Display

EC's primary headline and display typeface is a bold, condensed sans-serif that evokes industrial/punk festival energy. Based on visual inspection, the primary typeface shows characteristics of a condensed grotesque/gothic sans-serif, potentially custom or from the Bebas Neue / Barlow Condensed / Black Han Sans family. Key characteristics:

- Extremely heavy weight (Black/Ultra Bold)
- Slightly condensed proportions — fits more text in tighter spaces
- Used for: Main hero text, section headings, all-caps navigation labels, ticket names, stage headings, number displays
- Mixed upper/lowercase usage: ALL CAPS for navigation and buttons; Title Case for section headings; Sentence case for editorial headings

STYLE	SIZE RANGE	USAGE	WEIGHT
Display / Hero	48–64px	Hero headlines, campaign titles (THE CURE × TWENTY ONE PILOTS)	800
H1 / Page Title	32–40px	Page-level headings ("Festival Passes", "This is Electric Castle")	700
H2 / Section Title	20–28px	Section headings ("About VIP", "Music Stages", "Green Initiatives")	700
H3 / Sub-heading	14–18px	Sub-section labels, card headings ("Main Stage", "General Access Pass")	600
Body Large	16–18px	Feature descriptions, introductory paragraphs	400
Body Default	14–16px	Standard body copy, descriptions, rules	400
Body Small	12–14px	Captions, metadata, secondary info, tooltips	400
Label / Tag	10–12px	Navigation labels, form labels, badge text	600
Micro	8–10px	Legal text, footnotes, ANPC disclaimers	400

Secondary Typeface: Handwriting/Script

A key visual element of EC's identity is an authentic-looking handwriting/script font used for special slogans, section headlines, and the lineup display on the hero. This creates a raw, personal, underground aesthetic.

- Used for: Hero lineup text (artist names in white handwriting style), specific section slogans
- Examples: "THE VIBES SHOULDN'T END JUST BECAUSE THE CLOCK SAYS SO..." (EC Village), band name overlay on hero, "NATURE IS OUR DANCE FLOOR" (sustainability banner)
- Style: Irregular, marker/chalk-like strokes — evokes festival poster, hand-painted signage
- The font appears similar to: Permanent Marker, Caveat Brush, or a custom brush script
- Always white or light-colored when overlaid on dark backgrounds
- Never used for body text or UI labels — decorative/campaign use only

Tertiary Typeface: Editorial/Body

The body/editorial text uses a clean, readable serif or modern humanist sans-serif for long-form content sections (About, Sustainability, Previous Editions, International page). This creates a pleasant reading experience for longer content.

- Size: 14–16px for comfortable reading
- Weight: Regular (400) for body, Bold (700) for pull quotes or emphasis
- Line height: Generous — approximately 1.6–1.8x for readability
- The font observed appears to be a serif with strong readability: possibly Georgia, Libre Baskerville, or a similar editorial serif
- Usage: Only in content-heavy editorial sections — NOT in navigation, CTAs, or UI elements

Typography Patterns — Observed in Context

ELEMENT	STYLE	EXAMPLE
Navigation labels	ALL CAPS, Bold, 12–14px, letterspacing: 0.05em	"TICKETS", "MENIU", "BILETE DE O ZI"
Hero band names	ALL CAPS, Handwriting font, 36–72px (scales to fill)	"THE CURE × TWENTY ONE PILOTS × TEDDY SWIMS"
Page hero headline	Mixed case or ALL CAPS, Bold condensed, 32–48px	"FESTIVAL PASSES", "VIP EXPERIENCE"
Section heading	Title Case, Bold, 22–32px	"Festival Passes", "Music Stages", "Green Initiatives"
Card title	Bold, 14–18px	"General Access Pass", "Main Stage"
Price display	Bold, 28–36px + smaller "EUR" suffix	"250EUR", "139EUR" (was 200 EUR struck)
Body paragraph	Regular, 14–16px, generous line height	About page, Sustainability descriptions
CTA button label	ALL CAPS, Bold, 12–14px, letterspacing: 0.1em	"ADD TO CART", "ADAUGA IN COS"
Badge/tag label	ALL CAPS, Bold, 9–11px, colored background pill	"DETAILS", "LIMITED AVAILABILITY"
Stat number	Bold, 28–36px + unit	"274.000 attendees", "18,000 campers"
Date/meta	Regular or Medium, 11–13px	"16-19 July 2026", "+ booking fee 8%"
Footer link	Regular, 11px, color: gray or white	"Privacy Policy", "Terms & Conditions"
Tab label	Bold, 11–13px, ALL CAPS	"FESTIVAL ACCESS", "DAY TICKETS"

EC Logo — Description

The Electric Castle wordmark consists of two elements: (1) the "EC" monogram and (2) the full "ELECTRIC CASTLE" wordmark. The EC monogram uses a bold, slightly italic (oblique) sans-serif letterform in white, placed within a solid red (#DC3529) rectangle with slightly rounded corners.

Logo Usage Rules

- The EC monogram (red rectangle + white text) is always displayed in the top-left of the header/navbar
- The full "ELECTRIC CASTLE" wordmark is used at larger scales (footer, print, splash screens)
- The logo container is always rectangular with slightly rounded corners (~2–3px radius)
- On light backgrounds: Red rectangle with white "EC" text
- On dark/navy backgrounds: Red rectangle with white "EC" text (same treatment)
- Minimum size: EC monogram should never be smaller than 24×18px
- Clearspace: Minimum 1× height of EC block on all sides
- Never: Stretch, skew, recolor the logo, or place on busy backgrounds without a solid block
- The "EC Radio" variant uses the EC monogram with "Radio" text appended — treated as a sub-brand

Brand Textures & Patterns

EC uses several recurring visual textures that extend the brand identity:

- Hand-drawn/chalk artist names on the hero: Creates DIY festival poster aesthetic — white on photographic background
- The "x" separator: Used between artist names (THE CURE x TWENTY ONE PILOTS) — always white, same weight as name text
- "AND MANY MORE" with a slightly different, more casual font style appended to artist lists
- Green leaf icon: Used in the sustainability section footer — outlined, minimal, placed on green (#28B950) or dark backgrounds
- Horizontal rule dividers: Thin colored lines (EC Red) used to underline section titles — approximately 0.4–0.5px weight
- Dotted/dashed score separators on ticket list rows (alternating #F5F5F5 / white rows)

4. BUTTON SYSTEM

EC's button system is minimal but highly specific. Three main button variants exist:

Primary CTA — Yellow fill (#FFE600), Dark text (#0F1428), Bold ALL CAPS
14–16px, ~4–6px padding horizontal, ~8–12px padding vertical

Secondary CTA — Yellow outline, Dark text, same sizing as primary
Used for "Details", "See More", "Watch Aftermovie"

Tertiary/pill CTA — Dark fill (#0F1428), White text, small tag-like
Used for "DETAILS" pills on ticket list rows

Outlined on dark — White border, white text on dark bg sections
Used for "SEE HOW EASY IT IS TO GET TO ELECTRIC CASTLE"

- All buttons use ALL CAPS, Bold, ~12–14px type with ~0.05–0.1em letter-spacing
- Button border-radius: 0 (perfectly square corners) for full-width and large CTAs; can be slightly rounded (2px) for small pills
- Hover state: Slight brightness increase on yellow; opacity 0.9 on dark buttons
- Disabled state: Reduced opacity (0.4–0.5), pointer-events: none
- "Limited Availability" uses a plain text right-aligned label in the same row — not a button
- Cart count "(0)" in header uses minimal styling — parentheses, number, no box

Ticket / Pass Cards (Homepage)

The ticket/pass cards on the homepage and tickets page are a distinctive EC UI pattern. They use a vertical color-coded left border strip (4–6px wide) on an off-white card with dark text:

Ticket card anatomy:

- Background: Off-white cream (#F8F6F3 or similar near-white) — creates warmth against dark page background
- Left border stripe: 5–6px solid, pass-specific color — red, pink, blue, green, purple
- Pass name: Bold, 14–16px, dark navy, top-left of card content area
- Price: Bold, 26–32px, dark navy, bottom of card
- "+ tax" suffix: Regular, 10px, same color, appended after price
- Original price if discounted: Struck-through, lighter weight, smaller size, above current price
- "DETAILS" pill: Small tag at bottom of card — Dark fill, white text, same width as tag content
- Card spacing: ~8–12px internal padding from stripe to content, ~8px top/bottom

Ticket List Row Cards (Tickets Page)

On the dedicated tickets page, passes are displayed as horizontal list rows with more detail:

- Full-width row: passes span the full content width
- 5–6px left color strip, matching pass type
- Pass name: Bold, 14–16px, left-aligned
- "DETAILS" pill: Immediately below name, small dark tag
- Price: Bold large number (28–32px), "EUR" in smaller weight, right half of row
- "+ booking fee 8%" (\$Ø): Below price, 10px, gray, with info icon
- "Limited Availability": Right-aligned text, 10px, gray, above CTA button
- CTA Button: Yellow (#FFE600), right-aligned, text "ADD TO CART" in dark, ~70px wide
- Row hover: Subtle background shift, no dramatic change

Feature / Info Cards (EC Village, Music Stages)

Feature cards use a more editorial/visual approach:

- Image-led cards with text below: Bold title, optional description
- Music stage cards use ALL CAPS headings with the stage name in large bold type
- "What's good" scroll cards: Minimal, single headline on white/off-white bg, left red border
- Previous Editions cards: Year + attendee count + brief text, no fixed background color
- Partner location list: Simple text rows, no cards — just address text blocks

6. NAVIGATION COMPONENTS

The EC website uses a minimal, two-level navigation system:

Primary Header (Sticky)

- Full-width, solid EC Red (#DC3529) background, ~54px height
- Left: EC logo monogram (red box + white EC text)
- Left-center: Date badge "16-19 JULY 2026" — uppercase, 12px, white, with bullet separator
- Left-center: "BUY TICKETS" — uppercase, bold, white, slightly prominent — acts as a secondary CTA in the header itself
- Right: "LOGIN" | "CREATE ACCOUNT" — text links, white, regular weight
- Right: Cart icon with count "(0)" — white icon
 - Right: Language selector "EN!" — dropdown, white, 12px
 - Right: "MENU" + "a" — text + hamburger icon, white, bold 12px
- No horizontal rule or separator below header — red flows directly into content

Hamburger Menu (Full-Screen Overlay)

- Opens as a full-page or large panel overlay from right — dark navy (#0F1428) background
- Four section columns: EC12, THE FESTIVAL, EC WORLD, FESTIVAL ACCOUNT
- Section headers: ALL CAPS, bold, white — section title styling
- Items: Regular, 14–16px, white — listed vertically
- Active/current page: No visible indicator found — may use underline or color change
- Close button: "X" top-right, same position as MENU button, white

Ticket Page Tab Bar

- Full-width white or light gray bar below header
- Four tabs: FESTIVAL ACCESS | DAY TICKETS | CAMPING ACCESS | ACCOMMODATION
- Active tab: White background, bold text
- Inactive tab: Light gray background, regular weight
- Dividers: Thin vertical lines between tabs

Grid System

EC uses a fluid, content-driven layout without a rigid grid system, but consistent margins are maintained:

- Desktop content width: ~1200–1280px max-width, centered with side margins
- Horizontal margins: ~80px on large desktop, shrinks to ~24px on mobile
- Two-column layouts: Used on About page (text + visual), International page (directions + content)
- Four-column layouts: Used for ticket pass cards on homepage, feature benefit cards
- Single-column: Used for full-width hero sections, ticket list rows
- Nested content sections alternate between dark (#0F1428) and light (#FFFFFF or #F5F5F5) backgrounds

Section Rhythm & Spacing

- Page sections are clearly delineated by background color changes (dark !" light alte
- Vertical spacing between sections: Approximately 60–80px on desktop
- Section internal padding: Approximately 40–60px top/bottom
- Card grid gap: Approximately 16–20px between cards
- List row height: Approximately 64–80px for ticket rows, with 1px border separators
- Typography spacing: H1 bottom margin ~24–32px before first paragraph; paragraph bottom margin ~16–20px

Key Layout Patterns by Page

PAGE	LAYOUT PATTERN
Homepage	Full-bleed video hero !" 4-col ticket cards !" 3-col transport info !" 2-col about !" app newsletter
Tickets page	Full-width tab bar !" list rows (full-width, alternating color) !" infinite scroll
About page	Text-first single column !" stat blocks (3-4 per row) !" logo scroll !" values (2-col)
VIP Experience	Left sidebar nav !" right content column (80% width) !" feature tables
Music Stages	Anchor nav (8 stages) !" each stage as full-width section with content
Sustainability	Tab navigation (2 tabs) !" card grid (green-toned) !" stat highlights !" community se
EC Village	Hero video !" text narrative !" 4-col option cards !" carousel !" list !" map
International	Hero text block !" transport options (icon + text) !" city guide !" accommodation !" ne
Previous Editions	Vertical timeline (year + image + text) — single column
Footer	5-column link grid + newsletter form + social icons + legal + ANPC badges

8. COLOR-CODED PASS IDENTIFICATION SYSTEM

Each festival pass type has a unique color, consistently used as a left border stripe on all card and list row occurrences:

	General Access Pass	#AA3C32	Warm red-orange. Approachable, entry-level.
	VIP Pass	#D25096	Pink/magenta. Premium but fun. Nightlife energy.
	Youth Pass U25	#4682C8	Blue. Young, fresh, accessible.
	Camping Pass	#28B950	Green. Nature, outdoors, community.
	Ultra VIP Pass	#823CC8	Purple. Elevated, exclusive, aspirational.
	Black Ticket	#0F1428	Dark navy/black. Ultimate luxury.
	Day Ticket	#DC6432	Orange-red. Single-day energy burst.

9. STAGE IDENTITY SYSTEM

Each music stage at Electric Castle has a distinct visual identity and naming convention. Sponsors are integrated into stage names using "by [Sponsor]" phrasing:

STAGE NAME	SPONSOR	VISUAL/VIBE IDENTITY
MAIN STAGE	by Coca-Cola	The flagship stage. Full-width, open field. Largest visual presence.
HANGAR	by Banca Transilvania	Industrial warehouse aesthetic. Mixed electronic/alternative. Dark, atmospheric.
BOOHA	by glo	Iconic "first thing you see" stage. Industrial look. House/techno. High energy.
HIDEOUT	by #UNLOCKWONDER	Intimate, natural, bohemian. Afro house, organic. Exclusivity-coded.
THE BEACH	by —	Underground, avant-garde. Caribbean/global sounds. Niche, curated.
BACKYARD STAGE	by MobilaDalin	Garden/nature setting. Fairy lights. Warm, intimate, world music.
PING PONG STAGE	by Burn	Guilty pleasures, oldies. High camp energy. Fan-favorite throwback sets.
CAMPING STAGE	by —	Morning/daytime. Acoustic. EC Village, sunrise energy.

Photography Style

Electric Castle's photography is key to its visual identity. Imagery is always energetic, authentic, and emotionally charged. The photography style consistently features:

- Aerial/wide shots of the festival grounds — establishing scale, density, the castle as backdrop against the landscape
- Crowd/people shots — authentic emotional moments (raised hands, dancing, laughter) — never stock-photo-perfect, always real
- Night photography with stage lighting — dramatic, colorful stage lights against dark crowds — high contrast, vibrant
- Castle at dusk/dawn — architectural photography framing the 15th-century castle as a magical backdrop
- Artist performance shots — typically wide shots showing both performer and crowd reaction
- Camping/community moments — friends, tents, morning light, intimate gatherings
- Close-up wristband/crowd detail shots — texture and belonging

Photography Post-Processing Style

- High contrast, slightly saturated — rich blacks, vivid stage colors, warm skin tones
- Night shots: Preserve colored stage lighting (cyan, magenta, warm amber) — no over-correction
- Natural light shots: Warm, golden-hour color grading with slight film grain
- Drone shots: High saturation, sharp clarity — shows site layout and scale
- No heavy filters, no vintage desaturation, no pure black-and-white in current brand
- Slight vignette on atmospheric shots to draw focus toward center

Illustration & Graphic Elements

- Hand-drawn/marker artist name display (hero section) — creates raw, DIY poster aesthetic
- Icon set: Minimal, outline-style — bus icon, train icon, car icon (transport section); simple silhouettes
- Green leaf / sustainability icon: Outlined, thin stroke, 24–32px, organic feel
- Social media icons: Simple platform icons, white, in circular containers
- App store badges: Standard Apple App Store and Google Play badges — no modification
- ANPC regulatory badges: Standard Romanian regulatory icons — must display per legal requirements
- EC Radio player widget: Fixed to bottom of page — EC Radio wordmark + play button + volume slider

11. ACCESSIBILITY & MINIMUM STANDARDS

Based on observed design patterns, the following accessibility standards apply:

- Contrast ratios: EC Yellow (#FFE600) on Dark Navy (#0F1428) = 15.3:1 — EXCELLENT for WCAG AAA
- EC White (#FFFFFF) on Dark Navy (#0F1428) = 17.9:1 — EXCELLENT
- EC Red (#DC3529) on White (#FFFFFF) = 4.8:1 — PASSES WCAG AA (3:1+ for large text, 4.5:1+ for normal)
- EC Dark on Off-white = ~15:1 — EXCELLENT
- Minimum text size: 12px for any visible text (microcopy); 14px for body text
- Touch targets: Minimum 44×44px for all interactive elements (CTA buttons appear to be ~44–48px tall)
- Language toggle: Accessible dropdown with label "Select language"
- Form inputs: Labeled with placeholder text visible, explicit error states
- Images: Alt text used for icons and logos (verified from accessibility tree)

12. EC RADIO PLAYER — PERSISTENT UI

The EC Radio player is a persistent bottom-of-page element visible on all pages. It represents a unique sub-brand within EC:

- Position: Fixed to the bottom of the screen (above footer), or embedded as a bottom bar
- Background: Dark navy (#0F1428)
- EC Radio logo: "EC Radio" wordmark with small EC monogram
- Play/pause button: Circular, yellow fill (#FFE600), dark play icon inside
- Volume slider: Custom range input, yellow track
- Now Playing: "NOW PLAYING: [Artist — Track]" in small white text
- The player always shows current station playing — demonstrates 24/7 festival radio

13. FORM UI PATTERNS

EC form elements maintain the brand's clean, minimal aesthetic:

- Text inputs: Clean bordered field, subtle gray border (#DDDDDD), no fill/white background
- Placeholder text: Gray (#888888), lowercase (e.g., "your e-mail", "Email Address")
- Active/focused input: Border color changes to EC Red (#DC3529) or EC Yellow (#FFE600)
- Submit buttons: Yellow (#FFE600) with dark text, full width of form or defined width
- Error state: Red border (#DC3529), red error text below field, "This field is required."
- Dropdown: Standard select element with EC styling; language selector shows "En %1%
- Range slider (volume): Custom CSS, yellow fill on active track, circular thumb
- Checkboxes: Square, outlined, checked = filled with EC Red or Dark Navy
- Payment options: Horizontal choices with visual distinction (full/installments)

14. DARK MODE — EC'S PRIMARY AESTHETIC

Electric Castle is a dark-first design system. The primary experience is dark navy-based:

- Default page background: Dark Navy (#0F1428) for hero and immersive sections
- Editorial/information sections: White or off-white (#F5F5F5, #FFFFFF) backgrounds — used for content clarity
- The page alternates between dark (immersive/experiential) and light (informational) sections
- Text on dark: Always white (#FFFFFF) or yellow (#FFE600)
- Text on light: Always dark navy (#0F1428) — never black (#000000) — maintains warmth
- There is no user-toggable light/dark mode — EC enforces its design narrative
- The festival night/day duality is mirrored in the design: dark sections = nighttime magic; light sections = daytime clarity

15. SUSTAINABILITY VISUAL IDENTITY

The sustainability section has a distinct visual sub-identity within the EC brand:

- Primary color for sustainability: Earthy green (#28B950 or similar) — used for section labels, icon accents
- The "NATURE IS OUR DANCE FLOOR" wordmark is in a hand-drawn/graffiti style — same brush script as hero artist names
- Sustainability banner: Olive/muted green-toned photography with overlay text
- Stats blocks: Green number emphasis + white descriptive text on dark backgrounds

- Community section uses warm, community-focused photography (people, camping, nature)
- The "Your Bit" section uses a simple list format with green bullet dots — minimal, action-oriented

App Overview

The Electric Castle app (iOS & Android) extends the web design language into a mobile-native context. Available at apps.apple.com and Google Play. Key app features mirror the website's information architecture:

APP SECTION	CONTENT
Home / Dashboard	Event info, lineup preview, quick actions, countdown
Lineup / Artists	Browse, filter, favorite, set reminders
Daily Schedule	Day-by-day program with time slots per stage
Stages & Venues	Stage information, current/upcoming acts
EC Map	Festival map with stage locations, services, vendors
Tickets / My Orders	Ticket display, wristband credit management
RFID / Top-up	Wristband balance, top-up, refund
Vendors / Food	Food and drink vendor discovery
EC Radio	Integrated radio player with live stream
Aftermovie / Content	Personalized aftermovie, media
Notifications	Pre-set alerts, lineup updates, news
Settings / Account	Profile, preferences, language

Mobile-Specific Design Rules

- Bottom navigation: Minimum 5 tabs matching the primary user flows (Home, Lineup, Schedule, Map, Tickets)
- Tab bar: Dark navy background (#0F1428), active tab with yellow (#FFE600) indicator or icon fill
- App bar (top): EC Red (#DC3529) background — matches header color for brand consistency
- List items: Full-width touch targets, minimum 48px height, with stage color left borders for artist rows
- Cards: Maintain same off-white background card style as web, with colored left border for pass types
- CTA buttons: Full-width in mobile contexts where possible; yellow (#FFE600) with dark text
- Typography: Slightly larger for mobile — minimum 14px for body, 11px for captions
- Icons: 24×24px minimum touch-safe size, outline style matching web iconography
- Images: Full-bleed for hero; aspect ratio preserved for artist/stage photos
- Notifications: Red badge dots for unread notifications — dot size ~8px on app icon

App Copy Tone vs. Web Copy Tone

The app should mirror the web's tone but optimize for mobile context:

- Shorter headlines: Max 3–4 words for app section titles
- Action-first: "Build your schedule" not "You can build your schedule here"
- Push notifications: Brief, brand-voiced — "Chase & Status goes on in 30 mins. Get there now." not "Reminder: Artist performance soon"
- Empty states: Friendly, encouraging — "No favorites yet. Tap any artist to save them." not "0 items found"
- Error states: Same "OOOPS!" brand voice, with clear recovery action
- Onboarding: 3–5 screens max, one key benefit per screen, "Let's go" final CTA
